Republic of Moldova
- Marital status**  
Single

## Interests

- I love music, and I play bass guitar for almost 4 years, have some performing experience.
- I love football (soccer), I play football as an amateur.
- Science. I am not only passionate by Chemistry and Biology, but also History and Geography.

## Languages

- English
- Russian
- Romanian
- Hungarian
- German
- Armenian

My name is Arutiun, I am 20 years old. I am a student. I study Biochemical Engineering at the University of Debrecen, Hungary, BSc.

My goal is to apply the obtained knowledge in practice. I am interested in finding a job related to what I am studying. I am sure it will help me improve my skills. I am good at cooperating with people, helping them, working in groups, and coordinating their work. That is necessary for working in a lab.

Also, I would like to try myself as a tutor because I am good at explaining something to people and sharing my knowledge, especially in chemistry, as it has always been my favorite subject that I clearly understand. Thus, My goal is to help people understand it better.

## Education

**Biochemical Engineering BSc**  
The University of Debrecen, Debrecen

Sep 2022 - Jan 2026

I have finished 2 semesters out of 7.  
The main courses completed are:  
General chemistry: theory, seminar and practice;  
Basic Engineering: theory and practice;  
Mechanical Engineering;  
Informatics for Engineers;  
Biochemistry I: theory and practice;  
General Microbiology and Mycology;  
Microbial Physiology;  
Organic Chemistry: theory and seminar;  
Mathematics I and II: theory and seminar;

Currently attending (not completed):  
Analytical Chemistry: theory and practice;  
Methods in Molecular Biology: theory and practice;  
Biochemistry II: theory;  
Microbiology and Mycology: theory;  
Organic Chemistry II: theory and seminar;  
General Microbiology and Mycology: seminar;  
Unit Operations I: theory and seminar;

## Skills

- Microsoft Word
- Microsoft Excel
- Microsoft Power Point
